

AUGUSTO CURT HANSEN

Dublin, Phibsborough, D07 TV2P | +353 (83) 413 2311 | augustocurtdev@hotmail.com | Stamp 2

PROFESSIONAL SUMMARY

Modern SAP Developer and Mid Level Integration Specialist with over 5 years of enterprise-level software engineering experience. Proven track record as a **Main Developer** leading core system modernizations, specializing in bridging legacy SAP S/4HANA environments with modern cloud-native architectures. Expert in building resilient C#/.NET background services, microservices, and custom APIs that interact seamlessly with SAP ABAP Cloud (RAP, CDS, OData) and CPI pipelines. Adept at leveraging Docker, Azure DevOps, and automated CI/CD for .NET integrations, ensuring **100% data protection, eliminated manual bottlenecks, and maximum system reliability.**

CORE COMPETENCIES & TECHNICAL SKILLS

- **Modern SAP Development:** End-to-end full-lifecycle development including Fiori Apps, UI5, RAP (RESTful Application Programming Model), and OData services (V2/V4) for SAP S/4HANA.
- **SAP Ecosystem & ABAP:** Advanced ABAP, CDS Views, BADIs, RFCs, RDS, ALV Reports, **SmartForms**, User Exits, and SAP Cloud Platform Integration (CPI).
- **.NET Architecture & Cloud Services:** C#, .NET (Core/Framework), ASP.NET Core, MVC, Windows Forms, Worker Services, Microservices, RESTful APIs utilizing N-Tier/Controller-Service architectures, Solid OOP principles, and Microsoft Azure services.
- **DevOps, Containers & Version Control:** **Docker** (studying containerizing C# integration programs and microservices), **CI/CD pipelines for .NET applications** via Azure DevOps, Git/GitHub, Agile (Scrum), Automated Unit/Integration Testing.
- **Data Management & Optimization:** SQL Server, T-SQL, Entity Framework, PostgreSQL, Query Optimization, and high-performance transaction pipelines.

PROFESSIONAL EXPERIENCE

Systems Analyst / Main Integration Developer

Grupo Kyly | Pomerode, Brazil | *September 2021 – April 2026*

- **Main Developer** during a complex, enterprise-wide SAP implementation project, driving technical architecture and custom software delivery across MM, PP, EWM, FI, and CO modules.

- **Increased data integration efficiency and eliminated manual processing by 100%**, architecting automated C#/.NET and SAP CPI pipelines that ensured strict data protection, transactional consistency, and absolute accuracy across systems.
- Engineered full-lifecycle SAP solutions, ranging from core ABAP enhancements (BADIs, CDS, RFCs, SmartForms, ALVs) to modern Fiori Apps, UI5 interfaces, and RAP framework implementations.
- **Developed C#/.NET integration applications and Worker Service**, ensuring seamless, portable deployment across environments and real-time cross-platform data synchronization.
- **Established Azure DevOps CI/CD pipelines and automated backend testing for C#/.NET integration apps**, accelerating deployment cycles and cutting manual testing hours by 50%.
- Spearheaded heavy SQL Server database optimizations, rewriting complex T-SQL queries to drastically reduce system latency and prevent processing bottlenecks under high-volume enterprise traffic.

System Developer

Esquematika | Blumenau, Brazil | *May 2021 – September 2021*

- Programmed high-performance backend and frontend features, and business logic for client web applications utilizing Java, SpringBoot, HTML and CSS, and Git version control.
- Architected organized, scalable database solutions and entities using Entity Framework with optimized SQL queries.
- Rapidly diagnosed and resolved critical software bugs to maintain uninterrupted operations and strict data accuracy for client platforms.

EDUCATION & GLOBAL MOBILITY

- **General English Course (C1 Advanced Level)** | International House Dublin (*May 2026 – Present*)
 - Relocated to Ireland to expand international professional engagement and achieve native-level technical communication.
- **Bachelor's Degree in Information Systems** | Uniasselvi, Brazil (*Expected Dec 2026*)
- **Computer Science Studies** | FURB, Brazil (*2020 – 2022*)
